Application for Human (Public) Service Programs

*Part III-A: Specific Supplemental Information
for the City of Auburn*

Application for City of Auburn
2009-2010 General Funds

and

2009-2010 Community Development Block Grant (CDBG)
Public Service Funds

City of Auburn's Supplemental Instructions for the 2009-2010 Human Service Grant Application

A. Introduction

Applications submitted to the City of Auburn for human service grants must also include information requested in these "Supplemental Instructions". The City will consider applications that do not include the information requested in these Supplemental Instructions as incomplete and non-responsive. Incomplete applications will not be considered for funding. These Supplemental Instructions outline the additional information that the City will request for its consideration of a grant for human services.

B: PY2009-2010 Supplemental Application Form:

Agencies seeking human service grants from the City of Auburn must complete the attached "Supplemental Grant Application" form. The application form will ask grant applicants to mark the appropriate statement that best describes the results the Agency will help accomplish. Agencies must provide some additional information to the narrative portion of their grant application. Finally, grant applicants will need to acknowledge that their Agency will participate in the design and development of Auburn's proposed One-Stop Center.

The 2009-2010 Supplemental Application is the City of Auburn's continued effort to use "Results-Based Accountability" (RBA) in its consideration of human service grants. The City realizes that the transition to RBA is a significant one and that it will take several years for the full benefits to be realized. Making this transition to RBA is not expected to initially result in the exclusion of agencies and programs that the City of Auburn has supported in the past. However, the City does expect that all agencies and programs that receive City funding from this point forward will support the goals of RBA, tailor their efforts to work cooperatively towards these goals, and work cooperatively on the planning for a one-stop, multi-service center in Auburn. As such, the application form has been revised to allow your agency to demonstrate understanding and support for these initiatives.

C. One-Stop Center: Background Information

The following information provides some background for Auburn's proposed One-Stop Center. The results of the One-Stop Center will generally fall into two categories: procedural results and programmatic results. The following outlines some of the procedural results that the City of Auburn hopes to achieve through the proposed One-Stop Center. It also explains why the City of Auburn is considering grant applications for programs that will eventually be provided from a facility that is not yet built.

Towards a Comprehensive Human Service Delivery System:

The term "human service system" is something of a misnomer. In most cases, the delivery of human services is not a system but a patchwork of separate programs at multiple sites throughout King County. While most of these programs strive to reintegrate their clientele into the economic mainstream and often serve the same populations, they work with little direct interaction, sharing of information or coordination. The City of Auburn wants to build connections between these different programs so that they function as a "group of interacting, interrelated, or interdependent elements forming or regarded as a collective entity" – which is the definition of a "system".

The collocation of human services at one site is a critical step toward developing a comprehensive human service delivery system. The benefits of the collocation of human services include improved formal and informal communications between clients and service providers. It facilitates client-related processes by simplifying access to programs and services. It creates bonds between staff from different organizations. Collocating human service providers at one location helps staff understand how different programs contribute to large community goals. It results in a more cost-effective, efficient response to the needs of Auburn residents while, at the same time, increasing the success of reducing poverty, or at least the ill-effects of poverty, in Auburn.

Auburn's Human Service Integration Strategy:

The City of Auburn is currently working with local service providers to design and develop a site where multiple human service programs can be provided in an integrated manner. In addition to achieving the programmatic results described in latter sections of this Supplemental Instructions, the City's proposed One-Stop Center will likewise achieve the following procedural results:

- **Integrating client intake and assessment procedures:** Collocation is one step in a larger effort to simplify and streamline client processes. Auburn's One-Stop Center will use a standardized in-take form to determine the need for a wide range of programs and services.
- **Integrating staff from multiple organizations and programs into teams:** One of the advantages of collocation is the ease by which staff from multiple agencies can work together. Auburn's One-Stop Center will create opportunities for multi-disciplinary teams of service providers to provide a coordinated and effective response to client needs.
- **Integrating a wider range of local service providers:** Each agency brings with it an assortment of private, non-profit, community-based, faith-based and for-profit organizations that are involved in the planning and delivery of a full range of human services. By causing all these agencies to work together, Auburn's One-Stop Center will increase the number of organizations providing core and supportive human services.
- **Integrating information and information systems:** Auburn's One-Stop Center creates the opportunity to develop an automated eligibility and case management system. This system could interface with the information needs of each agency as well as providing information about available resources and services that benefit the client.
- **Integrated monitoring and evaluation toward community results:** The overall goal of Auburn's One-Stop Center is to improve the quality of life of Auburn residents. Participating agencies will be able to collectively monitor and evaluate their impact on the lives of Auburn residents.

Creating the Demand for a One-Stop Center:

Even though Auburn's proposed One-Stop Center is not yet developed, the City of Auburn is making participation in the design and development of a the proposed One-Stop Center a pre-requisite to its consideration for a human service grant. In this way, human service

providers will move toward creating the agency interactions necessary for the One-Stop Center to become a reality. One of the major goals of the Auburn's proposed One-Stop Center is to create collaborative relationships among Auburn's human service providers that will evolve into the integration of operational procedures. A 'service delivery continuum' exists, either formally or informally, that places interactions between programs into the following categories:

Communication > Cooperation > Coordination > Collaboration > Integration > Consolidation
--

Auburn's goal is to create interactions that are further to the right of the continuum where greater collaboration and integration occurs. In this way, the City serves as a catalyst generating the desire and need for the integration of human services that a One-Stop Center offers.

D. Results-Based Accountability Model:

The City of Auburn is requesting proposals to achieve the following results within the areas listed below. Population performance indicators will be applied to assess the overall success of the effort and the value of ongoing support. Program performance indicators will be utilized to determine the effectiveness of individual programs.

Overall Result: One-Stop Center

The City of Auburn will fund human service providers who participate in the design, development and operation of a One-Stop Center in Auburn and the efficient, collaborative and integrated delivery of services it offers. Agencies who agree to participate in the design and development of a One-Stop Center in Auburn may apply for funding to accomplish one or more of the following community results:

- **Abused and Neglected Children:** The City of Auburn will fund human service providers that increase supportive services to children who are neglected and abused, specifically the number of children who are victims of on-going and repeated neglect and abuse, within the city of Auburn by 15% over the next three (3) years.
- **Victims of Domestic and Sexual Assault:** The City of Auburn will fund human service providers that increase the number of Auburn residents, who are victims of domestic violence, that make the transition to a safe environment and self-determining lifestyle by 15% within the next three (3) years.
- **Poverty Reduction:** The City of Auburn will fund human service providers who increase the number of Auburn residents no longer living in poverty by 15% within the next three (3) years.
- **Substance Abuse:** The City of Auburn will fund human service providers to develop strategies that increase the successful completion of treatment programs by Auburn residents who have serious behavioral and health problems due to substance abuse and chemical dependency by 15% within a three (3) year period.
- **Physically and Mentally Fit:** The City of Auburn will fund human service providers that increase the availability, accessibility and use of health care to its low income residents by 15% within a three (3) year period.

E. One-Stop Center: Specific Community Results:

Abused and Neglected Children

The City of Auburn has zero-tolerance for chronic child abuse and neglect. It wants service providers to participate in the development and operation of a One-Stop Center that has as part of its mission efficient and collaborative delivery of services and activities designed to reduce the number of abused and neglected children in Auburn. Agencies selected for funding is predicated on their acceptance of the following convictions:

- The ability of families to raise their children is inextricably linked to the support they receive in the neighborhoods and communities in which they live.
- The Auburn community has resources to support families and provide children a safe environment where they can thrive and grow.
- Collaboration among Auburn service providers is essential to achieve the mutual goal of reducing chronic abuse and neglect of children.

Results the City wants to achieve:

The City of Auburn's initiative to reduce the chronic abuse and neglect of children focuses on achieving the following five results:

1. Reduce the number and rate of children placed away from their birth families.
2. Keep children in school and striving for academic success by decreasing truancy.
3. Active, accessible and visible relationships among neighborhood and community resources, including resources available through faith based communities, to increase the availability of extended family support systems.
4. Information on how to access programs and services to prevent and/or stop the chronic abuse and neglect of children is readily available throughout the Auburn community.
5. Linkages for parents to get the financial assistance, job training, employment and/or childcare services they need to help alleviate the stress of living in poverty.
6. A Community Partnership Task Force that meets regularly to assist community leaders in implementing and evaluating these strategies and monitor efforts to reduce the chronic abuse and neglect of children in Auburn.

Performance Indicators

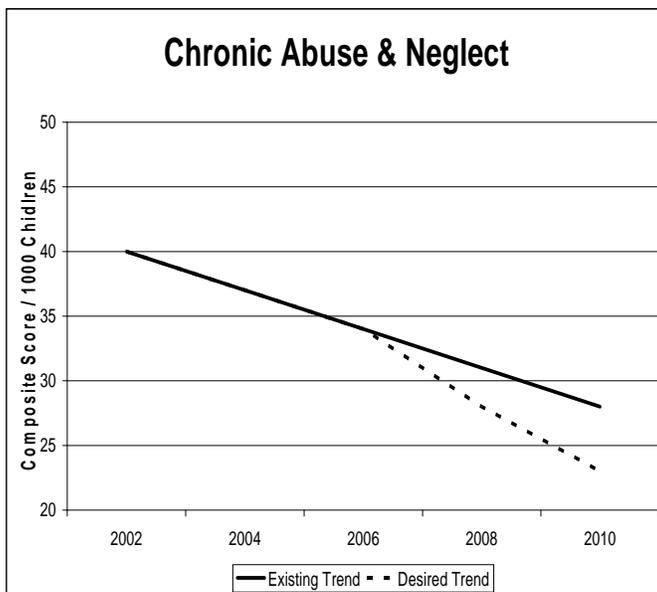

Impact on any of the following performance indicators will help achieve the desired results:

- Number of police reports of misdemeanor and felony child abuse and neglect
- Number of police incidence reports for juvenile runaways
- Number of truancy petitions filed by the Auburn School District
- Number of out-of-home placements reported by Child Protective Services (CPS)
- Number of confirmed CPS reports in Auburn

Baseline Performance

Indications of chronic neglect and abuse of children appear in several venues throughout the Auburn community. The baseline data on the right represents a composite score of the following indicators: arrest for misdemeanor and felony child abuse and neglect, incidence of runaway youth, BECCA petitions for truancy and foster-care placements. The actual number of each indicator was converted to number of incidences per 1,000 children under the age of 17 years. In this way, the increase of incidences caused by population growth is neutralized. These pro-rated incidences per 1,000 children were then combined to create a sum total or composite score.

Performance Indicators			
	Yr 2002	Yr 2004	Goal by Yr 2010
Arrests	18	27	23
Runaways	251	249	212
Truancy	202	160	136
Foster-care	81	81	69
totals	552	517	439
Composite Score per 1000 children	40	37	23

Turning the Curve:

The solid line indicates the trend if no additional action is taken. The downward or declining trend was caused by a reduction in petitions for truancy in Year 2004 compared to Year 2002. During the same period of time, the number of arrest for child abuse and neglect increased while the incidence of runaway youth and foster-care placements remained relatively unchanged. The broken line represents existing data up to Year 2004 and then the desired outcome in Year 2010 assuming initiatives to reduce child abuse and neglect are successful.

Victims of Domestic and Sexual Violence

The City of Auburn wants service providers to collaboratively organize a community-based intervention strategy that protects victims of domestic violence from harm and supports their right to self-determination. Toward this end, the City request service providers participate in the development and operation of a One-Stop Center that has as part of its mission the efficient and collaborative delivery of services and activities designed to reduce domestic violence. Agencies selected for funding is predicated on their acceptance of the following convictions:

- The Auburn community has resources available for the community to intervene to protect and assist victims of domestic and sexual violence.
- Intensive police, court and community collaboration is necessary to mobilize these resources and address situations of chronic and dangerous domestic violence.
- Written protocols among service providers, particularly between service providers and the City of Auburn's DV Advocate, that assures collaboration among all service providers that respond to victims of domestic violence.

Results the City wants to achieve:

1. Community-based intervention that provides victims safety from physical, emotional, financial and psychological harm, regardless of whether a victim is choosing to continue in a relationship with the abusive partner.
2. A collaborative and comprehensive intervention strategy for victims of domestic violence that is culturally sensitive and bilingual.
3. Abusers are held accountable for their abusive behavior by imposing swift, appropriate, consistent, foreseeable and commensurate consequences.
4. Service providers across all systems of support and protection actively participate in Auburn's DV Task Force and other coalitions dedicated to improving the Auburn's response to domestic violence.
5. Information on how to access programs and services to prevent and/or stop domestic violence is readily available throughout the Auburn community.
6. Auburn's faith-based community is a partner in its intervention strategy and actively participates in training, prevention and mobilization of community resources.
7. Prevention and public education programs for all age levels but particularly educational programs that focus on middle school youth and young men.

Performance Indicators

The following performance indicators will determine progress toward desired results:

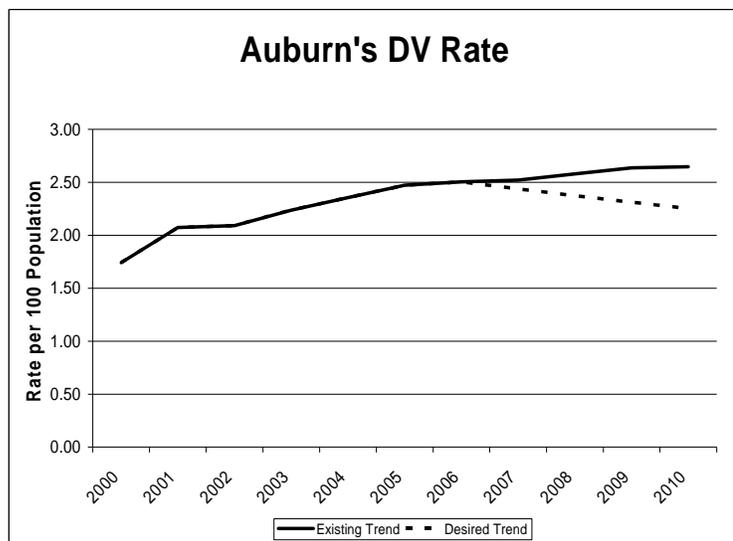

- Reduction in the number of cases reviewed by the City of Auburn's Legal Department for offenses involving domestic violence.
- Reduction in the number of people who are victims of domestic violence more than once.
- Reduction in the number of violations of protection and no-contact orders.

Baseline Performance

In Year 2001 the Police Department reported 912 incidences of domestic violence. In Year 2004 the Police Department reports 1,047 incidences of domestic violence, an increase of 6% per year. Although Auburn's population increased during the same period of time, Auburn's DV rate per 100 people increased at a faster rate. Auburn's DV rate in Year 2001 was 2.07 victims per 100 people. The DV rate increased to 2.36 per 100 people by the Year 2004. If this rate of increase continues, then by the year 2010 Police Department reports will likely indict over 1,675 cases of domestic violence each year or roughly five cases per day.

Turning the Curve:

The solid line in the above chart represents Auburn's DV rate per

100 people if no changes to the City's current delivery of DV programs and services are taken. The broken line represents existing data up to Year 2006 and then the desired outcome in Year 2010 assuming initiatives to reduce domestic violence are successful. The difference between the two lines is the theoretical number of victims who successfully make the transition to a safe environment and self-determining lifestyle.

Poverty Reduction

The City of Auburn wants to use a "systems" approach when designing its human service programs. Systems approach, in this case, refers to mapping out the connection between the need for human services and its roots causes – particularly poverty.

Auburn's resulting "poverty reduction strategy" is to combine employment and training programs to human service programs and incorporate these programs into the City's overall economic development strategy. The proposed One-Stop Center sets the stage for collaborative efforts for workforce development and poverty reduction strategies. Agencies selected for funding is predicated on their acceptance of the following convictions:

- Poverty is a common denominator among human service needs that is likewise a labor market issue that adversely affects the Auburn economy.
- The Auburn community has resources, or at least opportunities, that promote poverty reduction through workforce and economic development.
- Collaboration among Auburn service providers is essential to achieving the mutual goal of reducing poverty and its adverse human service and economic impacts.

Results the City wants to achieve:

1. People who live in poverty will not go hungry.
2. Auburn has a continuum of care for its residents who become homeless that includes emergency shelters, transitional housing and supportive housing along with supportive services that prevent homelessness.
3. A community-based development organization (CBDO), that meets the requirements of the Dept of Housing and Urban Development (HUD) for receipt of Community Development Block Grant, to carry out certain activities that reduce poverty specifically in Auburn by combining workforce development and human services.
4. Formation of a Workforce Investment Board that serves Auburn by promoting collaboration among service providers, employers, educators and residents for the purpose of placing Auburn residents in jobs located in Auburn.
5. A periodic inventory and analysis of potential linkages and gaps between the (a) employment needs of all the major businesses that are located in Auburn, (b) human service providers that provide opportunities for workforce development, and (c) educational and vocational training available in Auburn.
6. Employment training programs that likewise address some of Auburn's unmet needs such as minor home repairs, beautification of low-income neighborhoods, graffiti removal, abatement of public nuisances such as the removal of junk and debris, and response to emergency disasters such as fires, floods, and landslides.
7. Public transportation and child care services so that low-income Auburn residents can access good-paying jobs at nonstandard times – such as weekends and evenings.

Performance Indicators

The City's overall goal is to reduce Auburn's poverty rate by increasing the number of Auburn residents who successfully make the transition out of poverty. Progress toward this end includes a mix of economic development and human service indicators. The following performance indicators will determine progress toward desired results:

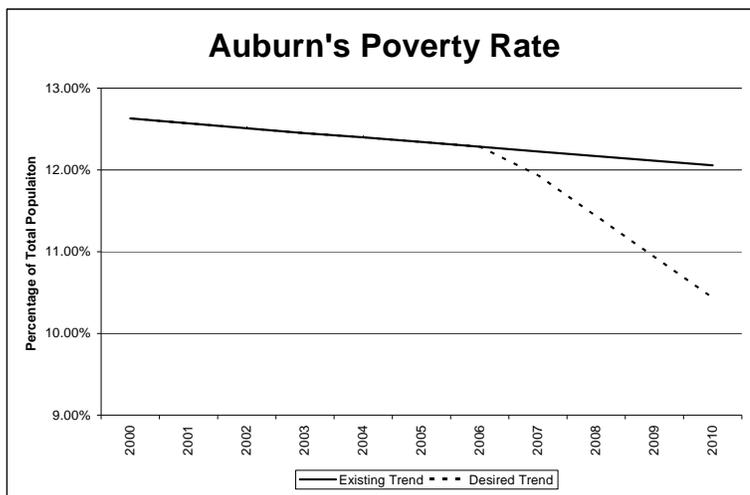

- Increase in the number of jobs, particularly livable wage jobs, located in Auburn.
- Increase in the number of Auburn residents who work in Auburn.
- Increase in the educational attainment of Auburn's adult labor force.
- Increase in the number of children enrolled in Headstart and preschool.
- Improved delivery of human services.

Baseline Performance

The poverty threshold assumes that families who spend a third or more of their income on four basic and essential food groups, as determined by the Dept. of Agriculture, are living in poverty. The poverty threshold amount varies by family size and composition. It does not vary geographically and the amounts are updated annually by using the Consumer Price Index. In the Year 2005, the poverty threshold for an individual was \$9,570, for two persons it was \$12,830 and for a four person household it was \$19,350 per year. In the year 2000 approximately 12.6% of Auburn's population lived in poverty. The estimated poverty rate for 2010 is approximately 12% of Auburn population will live in poverty by the year 2010.

Turning the Curve:

The solid line in the above chart represents Auburn's current and project poverty rate assuming no action is taken. The broken line represents Auburn's existing poverty rate up to Year 2006 and then the desired outcome by the Year 2010 assuming initiatives to reduce poverty are successful.

The difference between the two lines is the theoretical number of people who successfully make the transition out of poverty. If the poverty rate is 12%, then nearly 9,000 Auburn residents will live in poverty. The City of Auburn wants to reduce this number by over 1,000 residents over the next three years

Substance Abuse

The City of Auburn recognizes substance abuse, among other factors, as a bellwether of Auburn's physical and mental health. The proposed One-Stop Center sets the stage for a collaborative effort to develop a citywide strategy that supports the community efforts to address the harm and injury caused by substance abuse in Auburn. Agencies selected for funding is predicated on their acceptance of the following convictions:

- Problematic drug and alcohol use can be influenced by a range of factors and that, not only individuals, but family, community and the city environment can likewise influence drug behavior.
- The Auburn community is trying to address the impacts of drug and alcohol abuse.
- Collaboration among Auburn service providers is essential to achieving the mutual goal of reducing or eliminating drug and alcohol abuse.

Results the City wants to achieve:

1. Formation of the Auburn Substance Abuse Task Force to develop and monitor a community "Action Plan" that reflects the involvement and commitment of the community to reduce or eliminate drug and alcohol abuse.
2. A periodic inventory and report of local resources, activities and programs currently available to address drug and alcohol abuse
3. Collect, monitor and distribute local data regarding trends of drug and alcohol abuse in Auburn, including, but not limited to, information about binge drinking, drunken driving and alcohol/drug related deaths.
4. Dissemination of information regarding treatment programs and family support groups through faith-based organizations, schools and other service providers.
5. Community celebrations aimed to mobilize community support of programs and activities to discourage drug and alcohol abuse, binge drinking and drunk driving.

Performance Indicators

The following performance indicators will be combined to create a composite score per 1,000 residents to monitor trends relative to the community's impact to reduce drug and alcohol abuse.

- Number of adults and teens who report binge drinking.
- Incidences of crime involving drunk driving, disorderly conduct and violation of laws regarding controlled substances.
- Drug and alcohol related deaths.
- The number of faith-based organizations, civic groups, employers and service providers that offer family support groups and number of people who participate in these groups.

Baseline Performance

The City of Auburn's intent is to develop a community-wide strategy that will reduce the harm caused by drug and alcohol abuse by supporting the successful treatment of people in recovery programs. Although ample data exist regarding the impact of drug and alcohol abuse,

information about the number and availability of recovery programs and services that is unique to Auburn is not readily available. For this reason, the desired result is to gather information that identifies the recovery and supportive services available in Auburn, estimated number of people who participate in these programs and potential linkages between programs. This data will enable creating strategies to support and expand supportive services to people recovering from drug and alcohol abuse.

Turning the Curve:

During the process of gathering information about recovery and supportive services to people and their families suffering from drug and alcohol abuse, efforts can begin to organize and mobilize community resources. The desired results of organizing a community task force and distributing information is the start of developing more effective strategies that will eventually lead to a reduction of drug and alcohol abuse.

Physically and Mentally Fit

Auburn has a number of individuals and families who are unable to pay for the high cost of health care because they lack a health insurance policy that partially or fully covers the cost of medical procedures and prescriptions. At the same, Auburn has a large and growing health care industry within its city limits. It is the City of Auburn's intent to bridge the gap between the health care available in Auburn and those residents who need health care but can not afford it. Collaboration among Auburn service providers is essential to achieving this goal.

Results the City wants to achieve:

1. Auburn's children under the age of 19 years will have access to health care, including immunizations from contagious diseases.
2. Auburn babies and children are healthy, have adequate nutrition and prenatal care.
3. The number of sites within Auburn where low-income residents can access health care will continue to increase.
4. Reduction in emergency room visits because it is an indication that the availability and accessibility of health care to low income residents is improving.
5. Better dissemination of information about the availability of health care to low-income residents throughout the Auburn community.

Baseline Performance:

Lack of health insurance is a major barrier to obtaining needed and preventive health care. Uninsured individuals were less likely to get preventive care and needed screenings, increasing the likelihood of morbidity and mortality. They are also less likely to seek needed medical care due to cost. In the Auburn public health planning area, approximately 12.4% of adults report they did not see a doctor in the past year due to cost. Furthermore, approximately 16.1% of the adult population in the Auburn public health planning area does not have health insurance.

Several indicators will be used to measure the availability of health care in Auburn. For instance, low birth weight is an indicator of prenatal care. Infants born to mothers under age 18 have increased risk of death and low birth weight. Both the mother and the child tend to have fewer

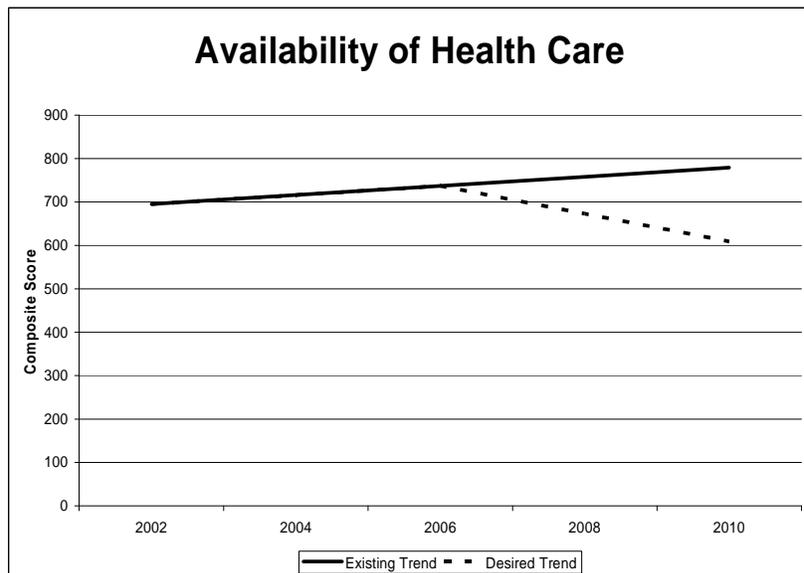

educational, economic and social opportunities. The younger the mother the more likely health problems and complications will occur.

Performance Indicators				
	Yr 2002	Yr 2004	Goal	
Uninsured Adults	105	161	137	per 1000 adults ages 18-64
Uninsured Children	78	40	34	per 1000 children under 18 yrs
Avoidable Hospitalizations	13	13	11	per 1000 adults ages 18-64
Unmet Medical Need	80	124	105	per 1000 adults ages 18-64
Low Birth Weight	6	6	5	per 100 births
No Flu & Pneumococcal Immunization	390	350	298	per 1000 adults age 65+
No Childhood Immunization	353	190	162	per 1000 children under 3 yrs
Teen Pregnancy	23	21	18	per 1000 females ages 15 - 17
Composite Score	1048	906	771	

Avoidable hospitalizations are another indicator of inadequate primary care or poor access to appropriate medical care. More than half of the avoidable hospitalizations were caused by bacterial pneumonia, congestive heart failure (CHF) and kidney/urinary infection. They account for 23%, 20% and 10% of all avoidable hospitalizations, respectively. Available vaccines for bacterial pneumonia could prevent about half of the hospitalizations for this condition. The Washington State immunization law requires that all children be immunized with specified vaccines for childcare and at school entry. According to the King County Department of Health, 81% of children between 19 – 35 months are immunization, which is a significant improvement over 64.7% in 2001. Individuals who live in poverty are almost twice as likely to have a condition for which hospitalization could be avoided.

Turning the Curve:

The City of Auburn would like to increase the availability and accessibility of health care to its low income residents by 15% within a three (3) year period. The sum total of the above performance indicators represents a composite score that signifies the availability and/or accessibility of health care in Auburn. The solid line indicates the trend if no additional action is taken. The broken line represents the outcome if initiatives to increase the availability of health care are successful. Activities or programs that reduce one or more of the above indicators should cause a reduction in current trends.

F. Instructions for the Supplemental Application

Agencies who want to apply for a One-Stop Center grant need to use the same application format and attachments described in "Part 1: Application Instructions" of the joint application with the following additions:

I. ORGANIZATIONAL EXPERIENCE (4 pages maximum)

- C. Relationship with One-Stop Center:** Please describe your existing or proposed relationship with the Task Force currently working on the design and develop of the One-Stop Center. What would be the Agency's relationship to the One-Stop Center after it is constructed and operational?

II. NEED FOR YOUR PROGRAM (3 pages maximum)

- C. Gaps in Delivery of Services in Auburn:** Please describe any gaps, if any, in Auburn human service delivery system relative to the grant application's proposed target population.
- D. How Proposal Intends to Fill Identified Gaps:** Please describe how your Agency's grant application will fill the gaps identified in Item C.

III. PROPOSED PROGRAM/SERVICE (7 pages maximum)

- E. Linkages to Poverty Reduction Strategies:** Please describe any services or activities provided through the program that are specifically related to reducing poverty and/or workforce development.
- F. Collaboration:** Please describe the collaborative relationships for which the Program, that is the subject of the grant application, will create access to Auburn residents. Please describe the nature and tenure of this collaborative relationship.

IV. LONG RANGE PLAN: (1 page maximum)

Please include in your narrative the Program and/or Agency's long-term plans relative to the proposed One-Stop Center.

V. BUDGET: (1 page maximum)

No changes to this section.

VI. SUPPORTING DOCUMENTATION

No changes to this section.

G. Funding Criteria:

<i>Funding Criteria</i>	<i>Points</i>
<ul style="list-style-type: none"> ▪ <i>Participation in the development and operation of Auburn's One-Stop Center</i> 	<i>MANDATORY</i>
<ul style="list-style-type: none"> ▪ <i>Proposal includes activities that generate the City's desired results.</i> 	<i>30 points</i>
<ul style="list-style-type: none"> ▪ <i>Evidence of collaborative relationships with other Auburn service providers, schools, faith-based organizations, law enforcement, and other agencies currently engaged in generating the desired outcomes.</i> 	<i>25 points</i>
<ul style="list-style-type: none"> ▪ <i>Linkage to poverty reduction strategies.</i> 	<i>20 points</i>
<ul style="list-style-type: none"> ▪ <i>Proposal includes an evaluation plan to monitor performance relative to the indicators the City will use to determine results.</i> 	<i>15 points</i>
<ul style="list-style-type: none"> ▪ <i>Practical, feasible plan that will result in making Auburn residents better off.</i> 	<i>10 points</i>
<i>Total</i>	<i>100 points</i>

H. SUBMITTAL INFORMATION

Applications Deadline: Friday, May 30, 2008, by 4:00 P.M.

Applications may be mailed or hand delivered to:

Dept of Planning, Building and Community
 Attn: Michael Hursh, Human Services Mgr.
 25 West Main Street
 Auburn, WA 98001

For more information, please contact the City of Auburn's Dept of Planning, Building and Community at 25 West Main Street, Auburn, Washington 98001 or contact Michael Hursh, (253) 804-5029 or email at mhursh@auburnwa.gov.

Part III-A: City of Auburn Supplemental Application for Human Service Grants for the 2009 and 2010 Program Years.

Agency Name:	_____
Program Name:	_____
Grant Request:	_____

The City of Auburn is requesting proposals to achieve the following results within the areas listed below. Population performance indicators will be applied to assess the overall success of the effort and the value of ongoing support.

Overall Result: One-Stop Center:

The City of Auburn will fund human service providers who participate in the operation of a One-Stop Center in Auburn and the efficient, collaborative and comprehensive delivery of services it offers. Agencies participating in the One-Stop Center may apply for funding to accomplish one or more of the following community results. **Please mark the "Result Statement"(s) that the proposed grant application will achieve.**

Abused and Neglected Children: The City of Auburn will fund human service providers that reduce the number of children who are neglected and abused, specifically the number of children who are victims of on-going and repeated neglect and abuse, within the city of Auburn by 15% over the next two (2) years.

Victims of Domestic Violence and Sexual Assault: The City of Auburn will fund human service providers that increase the number of Auburn residents, who are victims of domestic violence, that make the transition to a safe environment and self-determining lifestyle by 15% within the next two (2) years.

Poverty Reduction: The City of Auburn will fund human service providers who increase the number of Auburn residents no longer living in poverty by 15% within the next two (2) years.

Substance Abuse: The City of Auburn will fund human service providers to develop strategies that increase the successful completion of treatment programs by Auburn residents who have serious behavioral and health problems due to substance abuse and chemical dependency by 15% within a two (2) year period.

Physically and Mentally Fit: The City of Auburn will fund human service providers that increase the availability and accessibility of health care to its low income residents by 15% within a two (2) year period.

Consideration for a grant from the City of Auburn requires adding information to the narrative portion of the Agency's grant application. The additional information is outlined in Section F in *"Part III-A: Specific Supplemental Information for the City of Auburn"*.

ACKNOWLEDGEMENT:

By signing below, the applicant agrees that the Agency will participate and work with the City of Auburn to design and develop a One-Stop Center for Human Services located in Auburn; and, if the One-Stop Center is found to be practical and feasible for the Agency, under future funding cycles the Agency will be required to participate in the operation of the One-Stop Center.
